

LASER	SPECIFICATION	
Long Pulse Nd:YAG Laser	Handpiece	Wavelength: 1064nm; Energy: up to 18J; Pulse Width: 3-10ms
	Standard treatment tip	Spot Size: 1.5mm; 3mm; 5mm; 8mm
	Variable spot size tip	Spot Size: 5mm-12mm
	Standard Fractional tip	Spot Size: 8mm; Spot density: 1000pcm
Er:YAG Laser	Handpiece	Wavelength: 2940nm; Energy: up to 2J; Pulse Width: 0.5-3ms
	Standard treatment tip	Spot Size: 3mm; 6mm; 9mm
	Variable spot size tip	Spot Size: 5mm-12mm
	Standard Fractional tip	Spot Size: 8mm; Spot density: 1000pcm
Erblass Laser	Handpiece	Wavelength: 1535nm; Energy: up to 5J; Pulse Width: 3-10ms
	Standard treatment tip	Spot Size: 3mm; 6mm; 9mm
	Variable spot size tip	Spot Size: 5mm-12mm
	Standard Fractional tip	Spot Size: 8mm; Spot density: 1000pcm
Q-Switched Nd:YAG Laser	Handpiece	Wavelength: 1064nm; Energy: up to 800mj
	Standard treatment tip	Wavelength: 1064nm
	Double Frequency tip	Wavelength: 532nm

Laser Touch

Multi Laser Platform

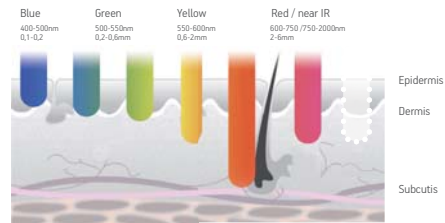

Laser touch, the multitasking laser solution

Laser Touch is the new multi-function light-based device, including 4 different laser handpieces. A laser platform that allow to treat any skin disease.

Laser Touch provide a wide range of applications used in the treatment of skin rejuvenation, hair removal, cutaneous vascular and pigmented lesions etc.

Laser Touch is the complete Laser solution for the treatment of all skin problems, it equips you with the versatility and speed to deliver results across a range of aesthetic procedures providing a personalised treatment to all patients.

Two callouts on the woman's back and abdomen indicate treatment areas:

- Top callout:** Skin resurfacing, Wrinkle reduction, Skin rejuvenation
- Bottom callout:** Hair removal, Vascular therapy, Scar and tattoo removal

4 different laser systems in a single machine:
with a simple gesture one can replace the handpiece
and obtain a Laser with completely different features!

Exchangeable handpieces from different lasers
Laser Handpiece Application parameters.

- 1 Long Pulse Nd:YAG Handpiece 1064 nm
Hair removal, vascular therapy, skin rejuvenation, wrinkle removal, spider veins.
- 2 Er:YAG Laser Handpiece 2940 nm
Scarring removal, skin resurfacing, wrinkle removal; shrink pores; skin rejuvenation.
- 3 Er:Glass Laser Handpiece 1535 nm
Wrinkle removal, scar removal, skin rejuvenation.
- 4 Q-S Nd:YAG Handpiece 1064/532 nm
Eyebrow line removal, tattoo removal, speckle removal, lip line removal, titian nevus removal:
 - 1064nm wavelength for dark blue and black tattoos: it can get rid of eye line, eyebrow line, lip line, tattoo, speckle (black, blue, etc.)
 - 532nm wavelength for red tattoos: it can get rid of eyebrow line, eye line, lip line, tattoo, speckle, titian nevus (red, brown, etc.)

The 10.4 full colour touch screen display allow to interact easily and intuitively with the device and to select and set all the useful parameters.
